Konsulko Group

A PAST, PRESENT, AND FUTURE IN EMBEDDED LINUX DEVELOPMENT

Konsulko Group is a team of embedded Linux and Open Source Software community and industry veterans. Our focus is upstream and production software design, enablement, optimization, and maintenance for customers in a wide array of embedded software markets.

CONTRIBUTING TO OPEN SOURCE COMMUNITIES FOR OVER 20 YEARS

To achieve the maximum benefit of Open Source, Konsulko Group believes production software should be fully aligned with **OSS community work** upstream. Konsulko's senior leadership have been contributors in the Linux kernel and other communities since the late 1990s. The entire Konsulko team is involved today in Open Source projects including the Linux kernel, U-Boot, Yocto Project, OpenEmbedded and Automotive Grade Linux (AGL).

EXPERT EMBEDDED SOFTWARE DEVELOPMENT WORLDWIDE

Headquartered in California, Konsulko Group's **Globally Employable Engineers™** work with customers throughout North America, Europe and Asia. We have engineering centers in Sofia, Bulgaria and Malmö, Sweden. We'd love to talk with you about engaging Konsulko's engineering expertise and experience on your project. Or if you're a software developer with a passion for Linux, please contact us about joining the Konsulko team.
