

Entry Level / Intern Embedded Linux/Yocto Engineer

Konsulko Group has an entry level or intern opening for an embedded Linux and/or Yocto build system engineer. Join and learn from a team of Linux engineers with a history of Linux development dating back to the mid 90s.

The position is ideally based at our engineering center in Sofia, Bulgaria, but other locations will be considered as well.

Job Requirements:

- A Passion for Linux
- B.S. or MS in Computer Science or similar major
- Experience in using Linux as a development platform
- Proficient in C programming
- Some Yocto Project, bash, or Python experience a plus
- Bonus points for having developed or debugged any kernel drivers, and any community contributions
- Familiarity with Git
- Strong analytical and problem-solving skills
- Good English verbal and written skills

Please send your CV or resume in pdf form to careers@konsulko.com.
